RACERS WANTED!

Canadian Karting League offers:

Purpose use karts:

Our high performance racing karts are for the exclusive use of our members. We ensure that every one of our karts is in top condition thanks to an aggressive maintenance procedure that ensures you will be racing not watching.

Timed Karts:

Before you arrive for your event, a professional driver has driven each of our karts the day before you arrive. His job is to tune each kart so that it will perform equally to all our other karts. We ensure that every kart is within 0.2 of a second over a complete timed lap – with transponders.

Professionally run

Our Chief Official is Mike Goodyear. He has been involved in motorsports for 20 years, and knows exactly how a quality arrive and drive program should work. Our commitment to Mike is to run the series like he would want to compete in.

Clean safe environment

We are committed to giving each of our members the ultimate racing experience. You spend your money with us, and we are committed to making sure that you get the most out of racing with us.

A word from the owner of CKL; Russ Bond:

"I have been around arrive and drive karting for years. It is clearly the best place for anyone to start racing simply because of the financial upside for the drivers – just show up, pay your money and race, its simple.

That being said, it is important that we give our members a good experience. I have seen arrive and drive with junk as karts that are not even remotely close in performance. That is not what we do here. Our karts are for our members only. They don't get used except at our CKL Championship races. We have a full time staff of mechanics to make sure all our karts are ready for competition on race day. I don't want our members watching karts get worked on – I want them racing.

I along with my staff am committed to giving each and every member the best racing experience possible in a safe, clean environment.

All I ask is that if you are happy with the Canadian Karting League, tell someone else about us, and if you are not happy, tell me."

Why choose CKL?

- Equal karts – all karts are tested before each event to within 0.2 of a second.
- Professional approach – we have seasoned professional racers on staff to help our members.
- Commitment – Our commitment to you is to give you excellent value for your racing dollar.
